(5) Click "Save" to input the file name and start converting

(6) Stand-alone Mode: Copying the bin file into the TF card with a card reader, then it will play in the fan

1> Stand-alone Mode: Copying the bin file into the TF card with a card reader, then it will play in the fan

2> Splicing Mode:

Method 1(Recommend): the software will cut the original video to be several parts, Copy each

## PC Software

video file to each TF card according to the ID number. copy part 0 to the host box and No.0 fan's TF card, and part-1 into No.1 fan's TF card..... and so on

Insert the TF card into each machine according to the ID number.

Method 2: Copy all files to all TF cards, and the contents of all TF card are the same. At this time, the TF card can be used without distinguishing the ID number.

(7)Insert these TF cards to each fan.

#### 4、 Attentions:

(1)When copying a spliced file, it is not allowed to have a TF card missing a split file of some videos.

(2)The output file name must be English and numbers. Special characters and symbols can't be read by the fan

(3)Single video length should not exceed 60 seconds

## Precautions

Before using, please check the voltage whether is the same with the 3D Holographic Display voltage or not.
